

# EVENT SUPPLIERS

## WHAT IS ENERGY REVOLUTION AND WHY BE A PART OF IT?

Energy Revolution is a charity working in the UK festival sector to combat climate change and balance travel-related carbon emissions. We work with audiences, festivals, the supply chain and artists to measure their carbon impacts and make donations that are invested directly into renewable energy projects to balance these impacts.

The Energy Revolution Suppliers Initiative enables you to calculate your real carbon emissions travelling to and from events. You will then have the opportunity to make a donation to 'balance' emissions. 100% of donations are invested in renewable energy projects; turning the travel carbon emissions into a world-changing positive energy investment.

Energy Revolution's suppliers initiative was developed with support from some of the UK's major event suppliers, including **Chai Wallahs**, **BES Systems**, **Tuned in Travel**, **Diplomats of Sound**, **Charge and Store**, **Refresh West** and **Rock City Stage Crew**.

## HOW DOES OUR SUPPLIERS INITIATIVE WORK?

- Sign up to Energy Revolution online [HERE](#).
- Record your travel journeys in our carbon calculator travel tool or an off-line travel log tool that we provide. Using industry certified metrics, the tool works out your total carbon emissions and provides a donation amount required to balance them. This can be done once a year, or regularly throughout the year, for a specific event, project or tour, or the company vehicle fleet – whatever works for you.
- We invest 100% of your donations in renewable energy projects which meet our policy criteria and trustee approval.
- We provide you with an annual certificate that shows the carbon emissions you have balanced.

## WHY SHOULD WE JOIN?

- It's an opportunity to balance your company's negative environmental impacts in a measurable and credible way.
- You'll be helping create renewable energy infrastructure that secures a safer, cleaner future for everyone.
- You demonstrate to clients and stakeholders that you are a responsible and innovative company.

## WHAT DOES MEMBERSHIP INCLUDE?

As well as admin support all year round, you'll receive:

- The Energy Revolution logo to use in press and marketing.
- Use of our supplier carbon calculator travel log tools.
- An annual carbon balance certificate.

## WHERE ARE DONATIONS INVESTED?

100% of donations made go directly towards generating clean energy – zero percent is used toward administration of the charity. Last year, all donations went to **Solar for Schools**; a project that puts solar panels on school roofs across the UK - providing clean, renewable energy for schools, saving schools money and providing an educational programme for school children to learn about clean energy. In the first year of operation, donations were invested with **The Converging World**, who operate wind turbines in the Tamil Nadu area of India. In the second year of operation, donations were invested with **Bristol Energy Co-op** a community-owned energy cooperative, growing Greater Bristol's local green energy supply and making the benefits available to all. 2017 donations went to support a community-owned wind turbine in the Forest of Dean, biomass boilers in Scotland and a project helping to fund solar PV for homeowners wanting to go green.

## GREAT – SIGN ME UP!

You can sign up [here](#). It's really quick and easy. The majority of this process is online, to keep our admin costs to a minimum, but feel free to get in touch to talk things through, please drop us an email on [hello@energy-revolution.org.uk](mailto:hello@energy-revolution.org.uk).
